DETAILED ACTION

Remarks

1. As discussed with the attorney of record, Yong Choi, it was determined that the preliminary amendment was received by the Examiner after the initial Office action was written. Therefore a supplemental Office action is being mailed.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 89-294, drawn to a voting machine and method of operating a voting machine, classified in class 235, subclass 386.
- II. Claims 295-340, drawn to a computer readable medium or encoded modulated signal, which causes the processor to perform a voting method, classified in class 705, subclass 12.

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the voting machine and method of operating a voting machine does not require the particular computer readable medium disclosed in invention II. The subcombination has separate utility such as the computer readable medium disclosed in the subcombination may be used to perform a

voting method on any other voting machine other than the voting machine disclosed in invention I.
